SUMMARY

AI/ML Engineer with hands-on experience building smart systems that actually work. I have used Python, YOLOv5, and LangChain to create real projects, such as an autonomous drone that tracks objects in real-time and an AI tool that answers questions by reading documents. I focus on building, testing, and getting results. I am looking to apply my machine learning skills to solve real-world problems in an AI engineering role.

EXPERIENCE

CBSC GLOBAL TECHNOLOGIES,PVT LTD

Associate Quality Engineer, Bengaluru,karnataka, India

Aug 2025 – Apr 2026

Worked as a Quality Engineer responsible for ensuring quality compliance of semiconductor and electronic products throughout the manufacturing lifecycle. Managed inspection and testing activities, investigated product and process quality issues through root cause analysis, and implemented corrective and preventive actions to improve product reliability. Collaborated with production, engineering, suppliers, and customers to resolve quality concerns, monitor quality performance, and drive continuous improvement initiatives while maintaining compliance with quality management system requirements and industry standards.

- **Key Skills Gained** : Quality Assurance (QA), Quality Control (QC), Root Cause Analysis (RCA), CAPA, Failure Analysis, SPC, FMEA, 8D Problem Solving, Supplier Quality Management, Process Improvement, ISO 9001, Defect Analysis, Quality Audits, Semiconductor Manufacturing, Electronics Quality, Continuous Improvement.

Skill Craft Technology

Internship, Pune,Maharashtra, India (Remote)

Jun 2025 – Jul 2025

Completed a one-month Data Science internship at SkillCraft Technology, where I worked on data analysis, data preprocessing, exploratory data analysis (EDA), and data visualization using Python. Gained hands-on experience in extracting insights from datasets, applying statistical techniques, and developing data-driven solutions to support decision-making.

- **Key Skills Gained:** Python, Pandas, NumPy, Data Cleaning, Data Analysis, EDA, Data Visualization, Statistics, Machine Learning Fundamentals, Problem Solving.

EDUCATION

Acharya Nagarjuna University, Guntur, India - B Tech, ECE - (GPA: GPA: 7.8)

Nov 2020 – Jul 2024

Velocity Junior College, Hyderabad, India - Intermediate, MPC - (GPA: GPA: 8.68)

Jun 2017 – May 2019

Viswabharathi English Medium High School, Gudiwada, India - High School, Board - (GPA: GPA: 9.3)

Jun 2016 – May 2017

TECHNICAL SKILLS

Programming	: Python, SQL
Machine Learning	: Scikit-Learn, Deep Learning, Neural Networks, Transformers
Generative AI	: LangChain, RAG(Retrieval-Augmented Generation), Prompt Engineering, OpenAI APIs, Hugging Face
Data Science	: NumPy, Pandas (Python Package), Matplotlib, Seaborn
Backend	: Flask, Fast API
Tools	: Git (Version Control System), GitHub
Databases	: SQLite
Cloud	: AWS(learning)

PROJECTS

Transformer block from scratch

Apr 2026 – May 2026

- Implements both pre-LN and post-LN configurations behind a single flag.
- The demo builds a six layer stack of each, sends a single forward and backward pass through, and prints the gradient norm at the input embedding for each variant.
- The pre-LN stack carries an order of magnitude larger gradient at the embedding than the post-LN stack at identical learning rate, which is the mechanism that lets modern decoder LLMs train without a warmup schedule.
- **Tools** : LayerNorm, multi head causal attention, residual, MLP, residual.

Flask Blog Application

Oct 2024 – Dec 2024

- Built a multi-user blog platform with user authentication, comments, and admin post management using Flask.
- Implemented secure login/registration with Flask-Login, password hashing, and relational models using SQLAlchemy ORM
- Integrated CKEditor and Gravatar to enhance the user interface and posting experience.
- **Tools:** Python, Flask, SQLAlchemy, Bootstrap, SQLite

OBJECT LOCKING BY USING DRONE SIMULATION IN UNITY

Dec 2023 – May 2024

- Simulated drone flight in Unity with realistic 3D physics.
- Integrated YOLOv5 for object detection and real-time tracking.
- Applied machine learning to automate drone responses based on detected objects.
- **Tools** : Unity, Python, YOLOv5, ML, Computer Vision

CERTIFICATIONS

100 Days of Code: The Complete Python Pro Bootcamp, Udemy

Feb 2025

Supervised Machine Learning: Regression and Classification, Coursera

May 2026

Deep Learning for Developers, InfosysSpringboard

Jul 2024

Playing Football
